

District Council of Lower Eyre Peninsula

MEDIA RELEASE

SEPTEMBER 27, 2017

Tulka S-bend

The Council would like to advise the general public that the shoulder widening on the Proper Bay Road S-Bend is about to recommence.

Works are expected to start before the end of the month and are planned to be completed by early January.

“We intend to limit the impact on the public as much as possible; however, in order to provide safe access for road users and a safe work environment for our construction staff there is a need for traffic control within the project site,” Chief Executive Officer Rod Pearson said.

“We ask that public take care when they are in the area and follow the directions of the traffic control.

“Council is well aware that the long delays have been an inconvenience to people using Proper Bay Road, and we ask for continuing patience as this project is concluded.”
